MVD reissuing some driver's licenses and IDs

Due to a programming error, driver's licenses and identification cards issued by the New Mexico Motor Vehicle Division between March 5 and March 22 inadvertently omitted street number information in the address fields.

MVD is mailing corrected licenses and ID cards to all customers affected by the problem over the next two weeks. Customers do not have to take any action as MVD has identified all those affected.

Customers can use the licenses mailed earlier this month until they receive their corrected versions. Once they receive the corrected licenses, they should then destroy the older versions, as they will no longer be valid.

The MVD apologizes for any inconvenience this may cause.
